

DSG GEARBOX FOR DISASSEMBLING AND ASSEMBLING

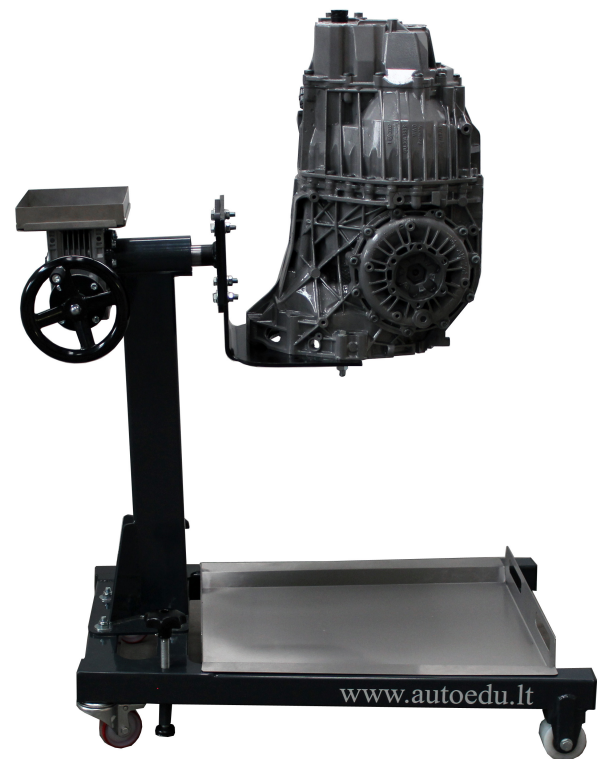

A2

Product number

GDVV01-DSG

Educational Trainer is designed for disassembling and assembling a dual-clutch DSG transmission featuring a dry-type double clutch, seven forward gears, and one reverse gear. The gearbox is mounted on a manually rotatable stand with worm and wheel gearboxes, offering 360° rotation. It includes a tool set, oil collection tray, tool tray, gearbox control handle, and stabilization propellers. The trainer is mobile on four castors for easy maneuverability and stability.

Features

- Includes a dual-disc clutch with torque transmission capability ranging from 240 to 280 Nm, and a gearbox with seven forward and one reverse gear.
- Features a 360° rotating mechanism with worm and wheel gearboxes, allowing for versatile positioning and examination of gearbox components.
- Complete set of tools for disassembly and assembly, enabling practical hands-on experience.
- Mobile and stable design, mounted on a mobile stand with four castors, equipped with stabilization propellers for enhanced stability during operation.
- Integrated tray for collecting drained oil, ensuring a clean and efficient working environment.
