

PETROL (GASOLINE) MPI ENGINE CHASSIS WITH ABS AND HYDRAULIC POWER STEERING

Product number

AE45273E

Front-drive chassis featuring a transversally mounted 4-cylinder petrol(gasoline) engine with 1200 cc displacement. Multipoint electronic fuel injection (MPI), an electronic ignition system, and an ECU. This tool also includes hydraulic power steering, a catalytic converter with an oxygen sensor, a 5-speed gearbox plus reverse, ABS braking with four sensors, and McPherson independent suspension systems. It is designed for real-world training applications, running on 220-volt power to operate at a reduced speed for easy observation of mechanical parts in action.

Features

- Fiat chassis with a 1200 cc, 4-cylinder petrol (gasoline) engine
- Multi-point injection (MPI) system
- Electronic ignition system
- Catalytic converter with oxygen sensor
- 5-speed manual transmission
- Hydraulic power steering
- Anti-lock Braking System (ABS)
- Independent front and subframe rear suspension
- Detailed cutaway design for easy inspection
- Clear labeling of components and systems
- Durable construction for long-term use

Specifications

- Dimensions (approx.): 220 cm x 160 cm x 115 cm (86.61 in x 62.99 in x 45.28 in)
- Weight (approx.): 290 kg (639 lbs)
- Product number: AE45273E
